Ghislain THEUBO

Paris / Réau area | +33 6 82 86 62 79 | bergerghislaintheubo@gmail.com
LinkedIn | Bilingual English/French | GitHub

Professional Summary

Software Engineer (Ensimag) specializing in **Python** scientific/engineering tooling, OOP architecture, automated tests, and Linux delivery. Built production scientific data platforms at **Gustave Roussy / CentraleSupélec MICS**, rewrote a large industrial module at **Dassault Systèmes** with TDD and design patterns, and practiced platform engineering at Shift Technology. Comfortable translating domain experts' needs into modular, maintainable software on Linux and Windows. Seeking **Ingénieur Développement Logiciel – Outils Métiers** at Safran Aircraft Engines (Réau / Modélisation Aérodynamique 3D) to evolve HPC and desktop scientific tools for design offices.

Core Strengths

Python (strong) · OOP & design patterns · Modular / maintainable architecture · Automated tests & CI · Linux & Windows · User-facing engineering tools · Numerical / data analysis appetite · English · Continuous learning

Experience

Shift Technology – Platform Software Engineering — Paris, France
Software Engineer (CDI – Platform / Backend) — *Sept 2026 – Nov 2026*

- Contributed to the **platform / foundations** squad building shared services used by product teams: design and implementation of **C# / .NET** components and **high-performance APIs** on **Microsoft Azure**.
- Worked with cloud data and messaging building blocks (**Azure Cosmos DB**, **Service Bus**), configuration/transversal services, and infrastructure-as-code awareness (**Terraform**) in a hybrid SaaS environment.
- Practiced production engineering habits: design discussions, code reviews, monitoring mindset, incremental delivery, and collaboration with platform and product engineers.

Gustave Roussy & CentraleSupélec MICS Lab — Paris / Saclay, France
Software Engineer (CDD – Scientific / Data Tooling) — *Jan 2026 – Sept 2026*

- Built **Python/FastAPI** tooling and backends for research workflows: validation, structured logging, observability; PostgreSQL tuning (∼**30%** faster critical reads).
- Sat with scientific users daily — decomposed complex analysis needs into incremental, testable software deliverables (same BE ↔ developer loop as Safran design offices).
- Docker + **GitHub Actions**; documentation for maintainability and operational handoff.

Dassault Systèmes – 3DEXPERIENCE / 3DSwym R&D — Vélizy-Villacoublay, France
Software Engineer Intern (Module Rewrite) — *Mar 2025 – Sept 2025*

- Full rewrite of the Survey module: OOP, design patterns, **TDD** (∼**85%** coverage), ∼**35%** performance gain — industrial quality bar for long-lived engineering software.
- Agile collaboration with product Champions; MoSCoW prioritization; Git + CI practices.

INRIA Grenoble – Humanlab / Froll'N'Roll — Montbonnot-Saint-Martin, France
Research Intern – Real-Time / Numerical Pipelines — *May 2024 – Aug 2024*

- C/FreeRTOS + Python pipelines under latency constraints; ∼**40%** responsiveness; multidisciplinary validation — rigor transferable to scientific solvers/tooling.

LIG – Laboratoire d'Informatique de Grenoble — Grenoble, France
Cloud Infrastructure Intern (OpenStack / Grid'5000) — *Feb 2025 – Mar 2025*

- Linux research HPC-like infrastructure experiments; reproducible automation scripts.

Selected Projects

Aero-style Pre/Post Tool Skeleton | Python, NumPy, OOP, pytest, GitLab CI notions — GitHub

- Modular Python package: ingest mesh/CSV-like data → analysis transforms → plots/export; plugin-style architecture for new methods.
- Automated unit tests + CI; Linux-first; Windows smoke notes — aligned with Safran dual-environment tools.

Parallel Batch Runner Sketch | Python, multiprocessing / MPI notions — GitHub

- Batch job runner with configurable workers and result aggregation — ramp toward distributed/HPC workflows.

Scientific API + Analytics Backend | Python/FastAPI, PostgreSQL — Gustave Roussy

- Production scientific software with tests, docs, and domain-expert collaboration.

Technical Skills

Core: Python, OOP, design patterns, modular architecture, automated tests
Delivery: Git, CI/CD (GitHub Actions; GitLab/Sonar appetite), Docker, Linux/Unix, Windows
Plus: FastAPI, numerical/data analysis (NumPy/SciPy), C/C++ foundations, MPI interest
Soft: listen to BE users, decompose complex problems, quality-first, learn fast

Education & Certifications

Grenoble INP - Ensimag — Grenoble, France
Engineering Degree – Information Systems / Software Engineering (Double Degree) — *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé — Yaoundé, Cameroon
Master's Degree in Computer Engineering – Top 12% of class — *2019 – 2023*

Certifications: Programming Foundations – TDD (LinkedIn, 2025) · Primerli – Insurance Industry Foundations (2025)

Languages & Extra

English: bilingual / professional · **French:** fluent · **Spanish:** intermediate
Extra: tutoring · tennis, football · motivated by aero numerical tooling at Safran Aircraft Engines
