LinkedIn | Bilingual English/French | GitHub

Professional Summary

Full-Stack Software Engineer (Ensimag) with product delivery on **Ruby on Rails** and **React** at Shift Technology (insurance SaaS), production APIs at Gustave Roussy, and a full module rewrite at Dassault Systèmes. Strong product appetite, Agile habits, and user-first pragmatism. Seeking **Junior Fullstack Engineer (Rails / React)** at Pennylane to build accounting software that helps founders and accountants act on financial data in real time.

Core Strengths

Ruby on Rails · **React.js** · Product mindset · Agile / squad delivery · User-centric UX · APIs & PostgreSQL · Tests & code reviews · Fintech / insurance domain signal · English

Experience

Shift Technology – Product / Platform Engineering — Paris, France
Software Engineer (CDI – Fullstack Rails / React) — *Sept 2026 – Nov 2026*

- Built and shipped **user-facing product features** for an insurance SaaS platform in a cross-functional squad (PM, designers, engineers): end-to-end delivery from discovery to production.
- Developed fullstack flows with **Ruby on Rails** (APIs, models, business rules, background jobs) and **React** interfaces used by internal operators and product teams — focus on clarity, speed, and maintainability.
- Collaborated daily on Agile ceremonies (planning, reviews, retros); translated ambiguous product needs into incremental, testable releases with code reviews and monitoring habits.
- Improved reliability of data-heavy workflows (validation, edge cases, performance) so non-technical users could trust the tool — same accountant/founder UX pressure as Pennylane.

Gustave Roussy & CentraleSupélec MICS Lab — Paris / Saclay, France
Software Engineer (CDD – Backend / Data Platforms) — *Jan 2026 – Sept 2026*

- Software Engineer (CDD) in joint coordination between **Gustave Roussy (Oncostat / CESP)** and **CentraleSupélec MICS**: built and maintained production backends for research/clinical data workflows.
- Designed **REST APIs** (Python/FastAPI) with validation, RBAC, structured logging, and observability; PostgreSQL modeling with indexing and query tuning (∼**30%** faster critical reads).
- Containerized services with **Docker**; automated tests and delivery via **GitHub Actions**; wrote technical documentation for data flows and operational handoff.
- Collaborated daily with domain experts (research/medical) — translating ambiguous needs into reliable, auditable software.

Dassault Systèmes – 3DEXPERIENCE / 3DSwym R&D — Vélizy-Villacoublay, France
Software Engineer Intern (Full-Stack Module Rewrite) — *Mar 2025 – Sept 2025*

- Full-stack overhaul of the legacy **Survey module** for **3DSwym** (3DEXPERIENCE collaborative platform): analyze, design, develop, and deliver a modern replacement.
- Backend in **Java 17+** / **Spring Boot** (MVC, Spring Data JPA) + **Hibernate**; applied **TDD** with JUnit; design patterns for modular maintainability.
- User-needs analysis with product "Champions", competitive benchmark, MoSCoW prioritization in Agile ceremonies; Git + CI/CD practices.
- Results: delivered core features of the new module with ∼**35%** performance improvement and ∼**85%** test coverage — robust, maintainable codebase for 3DSwym users.

INRIA Grenoble – Humanlab / Froll'N'Roll — Montbonnot-Saint-Martin, France
Research Intern – Real-Time Control Modules (Assistive Wheelchair) — *May 2024 – Aug 2024*

- Developed real-time control modules in **C**/**FreeRTOS** and Python for an electrically assisted manual wheelchair — direct user impact with continuous validation with the end user.
- Redesigned communication/data pipelines under latency constraints; improved responsiveness by ∼**40%**; contributed to open/documented research codebases.
- Human-centered engineering: DIY hardware/software integration, iterative prototyping, and clear technical communication in a multidisciplinary SED team.

Selected Projects

SME Finance Cockpit (MVP) | Ruby on Rails, React, PostgreSQL — GitHub

- Rails API + React dashboard for cashflow, invoices, and actionable KPIs — Pennylane-like founder/accountant UX.
- Auth, role separation (founder vs accountant), background jobs for bank-like imports; tests + CI.

Accounting Puzzle Automations | Rails, Sidekiq notions, React — GitHub

- Rules engine sketches to reduce manual reconciliation steps; product-first iteration with mock user feedback.

Technical Skills

Fullstack: Ruby on Rails, React.js, TypeScript/JavaScript, PostgreSQL, REST
Also: Python/FastAPI, Java/Spring Boot, Docker, Git, CI
Product: Agile squads, user stories, pragmatism, fintech/insurance SaaS exposure

Education & Certifications

Grenoble INP - Ensimag Grenoble, France
Engineering Degree – Information Systems / Software Engineering (Double Degree) *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé Yaoundé, Cameroon
Master's Degree in Computer Engineering – Top 12% of class *2019 – 2023*

Certifications: Programming Foundations – TDD (LinkedIn, 2025) · Primerli – Insurance Industry Foundations (2025)

Languages & Extra

English: bilingual / professional · **French:** fluent · **Spanish:** intermediate
Extra: academic tutoring (UGA DAEU maths; 4 years mentoring baccalaureate students in Cameroon) · tennis, football
