LinkedIn | Bilingual English/French | GitHub

Professional Summary

Backend Engineer focused on **scalable APIs**, reliability, and product impact. Experience optimizing high-traffic paths at **Dassault Systèmes** and shipping production services with observability. Building strong **Go** skills through dedicated systems projects (plus TypeScript/Rust notions). Product-led, bias for simplicity, fluent English. Eager to help **Prelude** scale authentication/trust infrastructure (Go, DynamoDB, SQS, Lambdas) with ownership and on-call mindset.

Core Strengths

Go · Distributed systems notions · APIs (REST / gRPC notions) · Performance & reliability · SQL / NoSQL notions · TypeScript / Rust (plus) · Product mindset · English (fluent)

Experience

Dassault Systèmes – 3DEXPERIENCE R&D Vélizy-Villacoublay, France
Software Engineer (Platform Performance) *Apr 2025 – Oct 2025*

- Engineered for scale on a large platform; **35%** latency improvement via simple, measurable changes — prefer simplicity that scales.
- Automated tests (85%), CI gates, design docs; collaborated internationally in English.

Gustave Roussy & CentraleSupélec MICS Paris, France
Backend Engineer (CDD) *Jan 2026 – Present*

- Production APIs with validation, RBAC, monitoring/alerting; SQL tuning (+30%); Docker/CI ownership.
- Client/stakeholder interaction to ship features that unblock real workflows.

INRIA Grenoble Montbonnot-Saint-Martin, France
Research Intern *May 2024 – Aug 2024*

- Latency-sensitive systems (+40%); reliability under constraints — transferable to auth API SLOs.

Personal Projects – Go Backend & Trust APIs

OTP Orchestrator (Go) | Go, PostgreSQL/DynamoDB-style design, SQS-like queue GitHub

- Go service that selects a delivery channel, rate-limits, and records verification attempts — Prelude-inspired auth building block.
- Focus on simplicity, idempotency, metrics, and load tests; documentation for on-call readiness.

Fraud Signal Worker | Go, message queue, Lambda-style workers GitHub

- Async workers scoring risk signals and blocking obvious abuse patterns; emphasizes extensibility and operability.

gRPC + TypeScript Admin Tool | Go gRPC, TypeScript GitHub

- Internal tool to inspect verification sessions — DX for developers/support; highlights TypeScript plus and product empathy.

Technical Skills

Primary push: **Go**, API design, concurrency, testing
Systems: queues, workers, caching, observability, reliability
Plus: TypeScript, Rust notions, Python, SQL
Culture fit: ownership, bias for action, care for customers & quality

Education

Grenoble INP - Ensimag Grenoble, France
Engineering Degree in Computer Science & Software Engineering *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé Yaoundé, Cameroon
Master's Degree in Computer Engineering (Top 12%) *2019 – 2023*

Languages

English: Bilingual (professional working proficiency)
French: Fluent
Spanish: Intermediate
