Professional Summary

Former **Dassault Systèmes** Software Engineer Intern on **3DEXPERIENCE / 3DSwym**, seeking CDI as **Ingénieur IA** (ENOVIA) to build shared AI-agent infrastructure. Combines Java/Python OOP delivery, automated tests, and clear specifications with hands-on LLM work (**LangChain / LangGraph**, RAG, REST agent gateways). Industrial product mindset from DS R&D; additional production APIs at Gustave Roussy and platform services at Shift Technology.

Core Strengths

Java & Python · **LangChain / LangGraph** · RAG & LLM apps · ML first experience · REST APIs · Automated testing · Specs & design docs · 3DEXPERIENCE exposure · English

Experience

Dassault Systèmes – 3DEXPERIENCE / 3DSwym R&D — Vélizy-Villacoublay, France
Software Engineer Intern (Full-Stack Module Rewrite) — *Mar 2025 – Sept 2025*

- Full-stack overhaul of the legacy **Survey module** for **3DSwym** (3DEXPERIENCE collaborative platform): analyze, design, develop, and deliver a modern replacement.
- Backend in **Java 17+ / Spring Boot** (MVC, Spring Data JPA) + **Hibernate**; applied **TDD** with JUnit; design patterns for modular maintainability.
- User-needs analysis with product "Champions", competitive benchmark, MoSCoW prioritization in Agile ceremonies; Git + CI/CD practices.
- Results: delivered core features of the new module with **∼35%** performance improvement and **∼85%** test coverage — robust, maintainable codebase for 3DSwym users.

Shift Technology – Platform Software Engineering — Paris, France
Software Engineer (CDI – Platform / Backend) — *Sept 2026 – Nov 2026*

- Contributed to the **platform / foundations** squad building shared services used by product teams: design and implementation of **C# / .NET** components and **high-performance APIs** on **Microsoft Azure**.
- Worked with cloud data and messaging building blocks (**Azure Cosmos DB**, **Service Bus**), configuration/transversal services, and infrastructure-as-code awareness (**Terraform**) in a hybrid SaaS environment.
- Practiced production engineering habits: design discussions, code reviews, monitoring mindset, incremental delivery, and collaboration with platform and product engineers.

Gustave Roussy & CentraleSupélec MICS Lab — Paris / Saclay, France
Software Engineer (CDD – Backend / Data Platforms) — *Jan 2026 – Sept 2026*

- Software Engineer (CDD) in joint coordination between **Gustave Roussy (Oncostat / CESP)** and **CentraleSupélec MICS**: built and maintained production backends for research/clinical data workflows.
- Designed **REST APIs** (Python/FastAPI) with validation, RBAC, structured logging, and observability; PostgreSQL modeling with indexing and query tuning (**∼30%** faster critical reads).
- Containerized services with **Docker**; automated tests and delivery via **GitHub Actions**; wrote technical documentation for data flows and operational handoff.
- Collaborated daily with domain experts (research/medical) — translating ambiguous needs into reliable, auditable software.

INRIA Grenoble – Humanlab / Froll'N'Roll — Montbonnot-Saint-Martin, France
Research Intern – Real-Time Control Modules (Assistive Wheelchair) — *May 2024 – Aug 2024*

- Developed real-time control modules in **C/FreeRTOS** and Python for an electrically assisted manual wheelchair — direct user impact with continuous validation with the end user.
- Redesigned communication/data pipelines under latency constraints; improved responsiveness by **∼40%**; contributed to open/documented research codebases.
- Human-centered engineering: DIY hardware/software integration, iterative prototyping, and clear technical communication in a multidisciplinary SED team.

Selected Projects

LangGraph Lifecycle Agent (PLM-inspired) | Python, LangChain, LangGraph, FastAPI — GitHub

- Multi-step agent (plan / retrieve / act / summarize) on a mock product graph; REST API with typed contracts and structured traces.
- Functional + technical design docs — reusable agent infrastructure pattern.

Engineering Docs RAG + Evaluation Harness | Python, LangChain, pytest — GitHub

- RAG over technical docs with evaluation set and retrieval metrics; simple classification baseline for routing.

Java Agent Tooling SDK (prototype) | Java, HTTP, JSON Schema, JUnit — GitHub

- Java library defining tool contracts, validation, retries, and telemetry hooks for shared LLM application needs.

Technical Skills

Languages: Java, Python, SQL, C/C++, C# (.NET at Shift)
AI/LLM: LangChain, LangGraph, RAG, tool/prompt design, evaluation basics
APIs & quality: REST, Docker, CI/CD, unit/integration tests, technical writing
Cloud: Azure / Cosmos / Service Bus notions (Shift)

Education & Certifications

Grenoble INP - Ensimag Grenoble, France
Engineering Degree – Information Systems / Software Engineering (Double Degree) *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé Yaoundé, Cameroon
Master's Degree in Computer Engineering – Top 12% of class *2019 – 2023*

Certifications: Programming Foundations – TDD (LinkedIn, 2025) · Primerli – Insurance Industry Foundations (2025)

Languages & Extra

English: bilingual / professional · **French:** fluent · **Spanish:** intermediate
Extra: academic tutoring (UGA DAEU maths; 4 years mentoring baccalaureate students in Cameroon) · tennis, football
