LinkedIn | Bilingual English/French | GitHub

Professional Summary

Software Engineer from **Ensimag** (0–3 years) who ships production backends fast: Python/FastAPI APIs at Gustave Roussy, Java/Spring at Dassault Systèmes, and platform APIs at Shift Technology. Strong in **Python** and **TypeScript**, daily AI-assisted coding (Cursor / Claude / Copilot) with human review, and a track record of turning ambiguous user needs into working tools in days. Seeking **AI Automation Engineer** at Harmattan AI (Paris, on-site) to build agents and automations that remove manual work across HR, finance, legal, sales, and manufacturing — owned end-to-end with measurable time saved.

Core Strengths

Python + **TypeScript** · APIs / webhooks / integrations · Internal tools · LLM agents & automation · Fast delivery with quality bar · User proximity · Side projects / ownership · English · Mission-driven

Experience

Shift Technology – Platform Software Engineering — Paris, France
Software Engineer (CDI – Platform / Backend) — *Sept 2026 – Nov 2026*

- Contributed to the **platform / foundations** squad building shared services used by product teams: design and implementation of **C# / .NET** components and **high-performance APIs** on **Microsoft Azure**.
- Worked with cloud data and messaging building blocks (**Azure Cosmos DB**, **Service Bus**), configuration/transversal services, and infrastructure-as-code awareness (**Terraform**) in a hybrid SaaS environment.
- Practiced production engineering habits: design discussions, code reviews, monitoring mindset, incremental delivery, and collaboration with platform and product engineers.

Gustave Roussy & CentraleSupélec MICS Lab — Paris / Saclay, France
Software Engineer (CDD – Backend / Data Platforms) — *Jan 2026 – Sept 2026*

- Built production **Python/FastAPI** backends for research/clinical workflows: validation, RBAC, structured logging, observability; PostgreSQL indexing (∼**30%** faster critical reads).
- Sat next to domain experts (research/medical), mapped painful manual steps, and shipped automations/APIs that reduced handoffs — same "user desks away" loop as AI Automation.
- Docker + **GitHub Actions**; documentation and operational handoff so others could run what was shipped.
- Used LLM tooling daily for drafts of specs, tests, and boilerplate — always re-validated before merge.

Dassault Systèmes – 3DEXPERIENCE / 3DSwym R&D — Vélizy-Villacoublay, France
Software Engineer Intern (Full-Stack Module Rewrite) — *Mar 2025 – Sept 2025*

- Full overhaul of the **Survey module**: Java 17 / Spring Boot / Hibernate, TDD (∼**85%** coverage), ∼**35%** performance gain — delivered usable product, not prototypes.
- Translated Champion/PM needs into MoSCoW-prioritized increments; shipped continuously with code review discipline.

INRIA Grenoble – Humanlab / Froll'N'Roll — Montbonnot-Saint-Martin, France
Research Intern – Real-Time Control (Assistive Wheelchair) — *May 2024 – Aug 2024*

- C/FreeRTOS + Python control modules; redesigned pipelines for ∼**40%** better responsiveness; continuous validation with the end user.

LIG – Laboratoire d'Informatique de Grenoble — Grenoble, France
Cloud Infrastructure Intern (OpenStack / Grid'5000) — *Feb 2025 – Mar 2025*

- Automated VM migration experiments; reproducible scripts and measurement notes — automation mindset under constraints.

Selected Projects (GitHub-ready)

Ops Agent Pack | Python, TypeScript, LangChain/agents, webhooks — GitHub

- Built small AI agents that triage tickets / HR leave requests / invoice checks via APIs + webhooks; measured minutes saved per run.
- Reliability layer: retries, idempotency keys, structured logs, simple dashboards for failure rates.

Internal Tooling Kit | TypeScript, React, FastAPI — GitHub

- Internal admin UI + API when SaaS tools did not fit: CRUD workflows, role checks, audit trail — shipped in days, iterated with users.

CRM/ERP Sync Glue | Python, REST, sync jobs — GitHub

- Bidirectional sync prototype between CRM-like and ERP-like fixtures; conflict rules and dry-run mode before production writes.

Technical Skills

Primary: Python, TypeScript, REST APIs, webhooks, FastAPI, Node/React tooling
AI delivery: Cursor / Claude / Copilot daily — agents, evals of prompts, human gate on merges
Quality: tests, logging, monitoring mindset, Docker, GitHub Actions
Also: Java/Spring, C#/.NET (Shift), PostgreSQL, Git
Soft: map processes with users, ship quick wins, own reliability

Education & Certifications

Grenoble INP - Ensimag — Grenoble, France
Engineering Degree – Information Systems / Software Engineering (Double Degree) — *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé — Yaoundé, Cameroon
Master's Degree in Computer Engineering – Top 12% of class — *2019 – 2023*

Certifications: Programming Foundations – TDD (LinkedIn, 2025) · Primerli – Insurance Industry Foundations (2025)

Languages & Extra

English: bilingual / professional · **French:** fluent · **Spanish:** intermediate
Extra: academic tutoring · tennis, football · side projects / hackathon-style shipping
