Professional Summary

Full-Stack Software Engineer (Ensimag) with strong **Java**, **SQL**, and product-minded delivery experience. Built production backends (APIs, data models, performance) at **Dassault Systèmes** and Gustave Roussy. Comfortable across the stack: **Java / Spring**, **Angular / TypeScript**, **Hibernate / MySQL**, Linux, and AI-assisted features. Eager to ship SaaS features end-to-end at **Wezen** — from MVP iterations to semantic algorithms — in a scale-up environment (Levallois, hybrid).

Core Strengths

Java / Spring · Angular / TypeScript · Hibernate / JPA · MySQL / SQL · REST APIs · Linux · CI/CD & Docker · Performance · AI features (notions) · Agile / MVP

Experience

Dassault Systèmes – 3DEXPERIENCE R&D — Vélizy-Villacoublay, France
Software Engineer (Platform & Performance) — *Apr 2025 – Oct 2025*

- Contributed to a large SaaS-scale platform in a 20-person R&D team; shipped features with product collaboration and quality gates.
- Delivered **35%** endpoint performance gains via algorithmic optimization and data-access tuning — relevant to Wezen's performance & semantic workloads.
- Implemented unit/integration tests (**85%** coverage) and CI quality gates; practiced code reviews and modular design.

Gustave Roussy Cancer Institute & CentraleSupélec MICS Lab — Paris, France
Backend Engineer (CDD – APIs & Data) — *Jan 2026 – Present*

- Designed REST APIs with validation, RBAC, logging; optimized SQL/indexing (**30%** faster).
- Dockerized services and automated delivery with GitHub Actions; owned features from design to production.

INRIA Grenoble – Humanlab / Froll'N'Roll — Montbonnot-Saint-Martin, France
Research Intern (Systems & Data Processing) — *May 2024 – Aug 2024*

- Built real-time modules under latency constraints; improved pipeline responsiveness by **40%**; documented and shipped with the team.

Personal Projects – Java Spring, Angular & Semantics

Collaborative Content Studio (SaaS MVP) | Java Spring Boot, Hibernate, MySQL, Angular — GitHub

- Built a multi-role content workspace (owners / writers / reviewers) with workflows, versioning, and MySQL persistence — mirrors Wezen's collaborative semantic content loop.
- Spring Boot REST + Hibernate entities; Angular TS front for editing/review; Linux Docker Compose deployment.

Semantic Distance Mapping Prototype | Java, embeddings, SQL — GitHub

- Prototype that clusters related text segments and surfaces correlations via distance metrics — inspired by Wezen's semantic differentiator.
- Exposed as an API consumed by a small Angular dashboard; focused on MVP iteration speed.

Technical Skills

Backend: **Java**, Spring Boot, Hibernate/JPA, REST, SQL/MySQL
Frontend: Angular, TypeScript, HTML/CSS
Ops: Linux, Docker, Git, CI/CD
Plus: AI feature integration notions, performance profiling, Agile/MVP

Education

Grenoble INP - Ensimag — Grenoble, France
Engineering Degree in Computer Science & Software Engineering — *2023 – 2025*

École Nationale Supérieure Polytechnique de Yaoundé — Yaoundé, Cameroon
Master's Degree in Computer Engineering (Top 12%) — *2019 – 2023*

Languages

English: Bilingual (professional working proficiency)
French: Fluent
Spanish: Intermediate
